Northern Field Seed Co.

WINONA, MINN.

I M P O R T A N T

There is a serious shortage of good Red Clover, Alsike and Alfalfa for 1938 seeding. Only domestic (home grown) and Canadian grown Red Clover seed and Alfalfa are recommended. Northern grown seeds are the safest to plant. Foreign grown Clovers and Alfalfas are less winter hardy and more subject to damage by insects and disease and produce smaller hay yields. The losses from using foreign grown seeds not adapted for this section warrant paying higher prices for domestic seed. A reduction in the cost of seeding is made possible with a good, firm, well prepared seed bed and by the use of Alsike and Timothy in the mixture.

We do not handle any European Red Clovers.

We advise ordering early while stocks are complete.
